Part I: Introduction

Waste receptacles, which are widely used in workshop and laboratory, are essential to store solvent soaked cloths and wiping rags with solvents (Hazmat disposal bags can be used to match the waste bins for the storage of corrosive chemicals), thinners, linseed oil, combustible adhesives and other flammable liquids. Durable steel construction with a powder-coat finish provides chemical resistance. It is also available in several sizes to accommodate specific needs. Choose red, yellow when color identification is desired or to differentiate department sites.
